NEURO-OPHTHALMOLOGY BOARD REVIEW MANUAL

Frank J. Bajandas, M.D.

Frank J. Bajandas, M.D.
Associate Clinical Professor
Department of Ophthalmology
University of Texas Health Science Center
San Antonio, Texas

At last, a handy, readable masterpiece that makes the core of neuro-ophthalmology easier to comprehend than anything else in print.

This manual has taken the main body of neuro-ophthalmic knowledge and processed it into a compact compendium for neurologists, neurosurgeons and ophthalmologists preparing for Board examinations, and has succeeded in rendering complex anatomy and pathology in clear and comprehensible terms.

The primary advantage of this manual is that neuro-ophthalmology is reviewed in concise outline form with key points to remember about each of the possible topic areas of questioning in a Board examination.

It can also be used as a textbook for supplementary study of neurology, neurosurgery and ophthalmology by medical students, interns and residents in training.
